Kelas: TI.22.A1

# PROGRAM STUDI TEKNIK INFORMATIKA FAKULTAS TEKNIK UNIVERSITAS PELITA BANGSA 2024/2025

# Penjelasan & Hasil Program Tugas 1

# 1. Launcher Splash Logo

Pertama, yaitu membuat Launcher Splash Logo atau menampilkan logo / icon saat kita pertama kali membuka aplikasi.

# Caranya adalah:

- Persiapkan gambar terlebih dahulu
- Selanjutnya kita klik 'app', lalu klik 'res' dan setelahnya kita pilih dan klik 'mipmap'
- Setelah itu klik kanan pada bagian 'mipmap', lalu pilih 'new'
- Lalu pilih dan klik 'Image Asset'
- Lalu ketika sudah terbuka, kita klik bagian 'Icon Type' lalu pilih yang 'Launcher Icons (Adaptive and Legacy)'
- Lalu pada bagian 'Path' kita klik logo file lalu kita pilih dan klik file gambar yang telah disiapkan sebelumnya dan klik 'OK'
- Lalu untuk ukuran logo / ikon bisa kita atur pada bagian 'Resize', Jika sudah kita klik 'Next'
- Setelah itu kita klik 'Finish', Maka logo / ikon aplikasi kita akan berubah sesuai gambar yang kita inginkan

Untuk menambahkan file gambar seperti untuk SplashScreen, Background di setiap project kita bisa klik bagian 'Resource Manager' lalu kita klik tanda '+'. Setelah itu kita pilih dan klik 'Import Drawables', setelah itu kita pilih dan klik file gambar yang sudah kita siapkan lalu klik 'OK'. Maka gambar akan tersedia di 'res' pada 'drawable'.

```
android:gravity="center" />
  </item>
</layer-list>
> Untuk Warna bisa kita sesuaikan dengan Logo yang telah kita tambahkan sebelumnya
- Lalu, buka 'themes.xml' yang letaknya ada di *res/values/themes*, dan tambahkan code ini
didalam resourcesnya:
<re>ources xmlns:tools="http://schemas.android.com/tools"></re>
  <!-- Base application theme. -->
  <style name="SplashScreen" parent="Theme.MaterialComponents.DayNight.NoActionBar">
     <item name="android:windowBackground">@drawable/bg2</item>
     <item name="android:statusBarColor">?attr/colorOnPrimary</item>
  </style>
</resources>
- Selanjutnya kita buat java class nya agar SplashScreen bisa berjalan, lalu pada
`SplashScreen.java` kita masukkan code dibawah ini:
package com.tgs9;
import android.content.Intent;
import android.os.Bundle;
import android.os.Handler;
import androidx.appcompat.app.AppCompatActivity;
```

```
public class SplashScreen extends AppCompatActivity {
  @Override
  protected void onCreate(Bundle savedInstanceState) {
     super.onCreate(savedInstanceState);
    new Handler().postDelayed(new Runnable() {
       @Override
       public void run() {
         startActivity(new Intent(SplashScreen.this, MainActivity.class));
         finish();
    }, 2500);
> Code di atas digukankan untuk menampilkan SplashScreen, ketika SplashScreen selesai dalam
2.5 detik maka akan langsung berpindah pada tampilan 'MainActivity.java'.
- Buka 'AndroidManifest.xml', dan tambahkan code berikut didalam *application* :
<activity
       android:name=".SplashScreen"
       android:exported="true"
       android:theme="@style/SplashScreen">
       <intent-filter>
         <action android:name="android.intent.action.MAIN" />
         <category android:name="android.intent.category.LAUNCHER" />
```

```
</intent-filter>
</activity>
```

Selesai sudah kita membuat perintah Launcher Splash Logo, Selanjutnya kita akan ke tahap berikutnya yaitu membuat menu untuk menampilkan semua project yang sudah dibuat pada pertemuan sebelumnya.

### ## 2. Menu Utama

Yang kedua, disini kita akan membuat menu utamanya yang akan berjalan setelah SplashScreen Logo.

Caranya adalah:

Jika awal pembuatan project kita memilih template Empty Views Activity, maka pada layout otomatis terbuat file `activity\_main.xml` dan pada java akan ada `MainActivity.java`.

Maka langsung saja kita buka 'activity\_main.xml', dan buat code seperti berikut ini:

```
<?xml version="1.0" encoding="utf-8"?>
<RelativeLayout xmlns:android="http://schemas.android.com/apk/res/android"
    xmlns:tools="http://schemas.android.com/tools"
    android:layout_width="match_parent"
    android:layout_height="match_parent"
    tools:context=".MainActivity">

<ImageView
    android:layout_width="match_parent"
    android:layout_width="match_parent"
    android:layout_height="match_parent"
    android:background="@drawable/bg1"</pre>
```

android:adjustViewBounds="true"

```
android:scaleType="centerCrop"/>
```

```
<TextView
  android:id="@+id/txtJudul"
  android:layout width="match parent"
  android:layout height="68dp"
  android:layout alignParentTop="true"
  android:layout alignParentBottom="true"
  android:layout_marginTop="46dp"
  android:layout marginBottom="569dp"
  android:gravity="center"
  android:scaleType="centerCrop"
  android:text="Please select and click on the project below"
  android:textColor="@color/black"
  android:textSize="25dp"
  android:textStyle="bold" />
<Button
  android:id="@+id/btnHelloWorld"
  android:layout width="150dp"
  android:layout height="60dp"
  android:layout_alignParentStart="true"
  android:layout alignParentTop="true"
  android:layout alignParentEnd="true"
  android:layout_marginStart="100dp"
  android:layout marginTop="200dp"
  android:layout marginEnd="100dp"
  android:onClick="btnHelloWorld"
```

```
android:background="@color/hijaumuda"
android:text="Hello World!!!"
tools:ignore="UsingOnClickInXml"
android:scaleType="centerCrop"/>
```

### <Button

```
android:id="@+id/btnProjectCount"
android:layout_width="150dp"
android:layout_height="60dp"
android:layout_below="@+id/btnHelloWorld"
android:layout_alignParentStart="true"
android:layout_alignParentEnd="true"
android:layout_marginStart="100dp"
android:layout_marginTop="20dp"
android:layout_marginEnd="100dp"
android:layout_marginEnd="100dp"
android:background="@color/cream"
android:text="Count"
tools:ignore="UsingOnClickInXml"
android:scaleType="centerCrop"/>
```

### <Button

```
android:id="@+id/btnProjectSianida"
android:layout_width="150dp"
android:layout_height="60dp"
android:layout_below="@+id/btnProjectCount"
android:layout_alignParentStart="true"
android:layout_alignParentEnd="true"
```

```
android:layout_marginStart="100dp"
android:layout_marginTop="20dp"
android:layout_marginEnd="100dp"
android:onClick="btnSianida"
android:background="@color/birumuda"
android:scaleType="centerCrop"
android:text="Scroll Movie"
tools:ignore="UsingOnClickInXml" />

<Button
android:id="@+id/btnTwoActivity"
android:layout_width="150dp"
android:layout_height="60dp"
```

```
android:id="@+id/btnTwoActivity"
android:layout_width="150dp"
android:layout_height="60dp"
android:layout_below="@+id/btnProjectSianida"
android:layout_alignParentEnd="true"
android:layout_alignParentStart="true"
android:layout_marginTop="20dp"
android:layout_marginEnd="100dp"
android:layout_marginStart="100dp"
android:onClick="btnTwoActivity"
android:background="@color/pink"
android:text="Two Activity"
tools:ignore="UsingOnClickInXml"
android:scaleType="centerCrop"/>
```

### <Button

android:id="@+id/btnSetAlarm" android:layout\_width="150dp"

```
android:layout_height="60dp"
    android:layout below="@+id/btnTwoActivity"
    android:layout_alignParentStart="true"
    android:layout alignParentEnd="true"
    android:layout marginStart="100dp"
    android:layout marginTop="20dp"
    android:layout_marginEnd="100dp"
    android:onClick="btnSetAlarm"
    android:background="@color/purple"
    android:text="Set Alarm"
    tools:ignore="UsingOnClickInXml"
    android:scaleType="centerCrop"/>
</RelativeLayout>
- Setelah itu kita buka 'MainActivity.java' untuk menambahkan code intent untuk masing-
masing tombol:
package com.tgs9;
import androidx.appcompat.app.AppCompatActivity;
import android.content.Intent;
import android.os.Bundle;
import android.view.View;
public class MainActivity extends AppCompatActivity {
  @Override
```

```
protected void onCreate(Bundle savedInstanceState) {
  super.onCreate(savedInstanceState);
  setContentView(R.layout.activity_main);
  findViewById(R.id.btnSetAlarm).setOnClickListener(new View.OnClickListener() {
    @Override
    public void onClick(View v) {
       // Panggil metode untuk mengatur alarm
       setAlarm();
    }
  });
private void setAlarm() {
  Intent alarm = new Intent(android.provider.AlarmClock.ACTION SET ALARM);
  startActivity(alarm);
}
public void btnHelloWorld(View view) {
  Intent helloworld = new Intent(MainActivity.this, HelloActivity.class);
  startActivity(helloworld);
}
public void btnCount(View view) {
  Intent count = new Intent(MainActivity.this, CountActivity.class);
  startActivity(count);
}
public void btnSianida(View view) {
```

```
Intent sianida = new Intent(MainActivity.this, SianidaActivity.class);
     startActivity(sianida);
  }
  public void btnTwoActivity(View view) {
     Intent twoact = new Intent(MainActivity.this, TwoActivity.class);
     startActivity(twoact);
  }
> Button *HelloWorld, Count, Sianida dan TwoActivity* menggunakan Explicit Intent, dan
project *SetAlarm* menggunakan Implicit Intent.
> Menu halaman utama dan tombol-tombol aplikasi sudah berhasil dibuat. Maka selanjutnya
yang kita lakukan adalah menambahkan coding pada 'AndroidManifest.xml' agar aplikasi dapat
berjalan.
## 3. AndroidManifest.xml
Didalam 'AndroidManifest.xml' kita tambahkan semua java class dari semua project kita
sebelumnya. Berikut nama java class dari berbagai project yang telah saya buat:
a. Project Hello World = HelloActivity.java
b. Project Count = CountActivity.java
```

c. Project Scroll Movie = SianidaActivity.java

d. Project TwoActivity = TwoActivity.java dan Two2Activity.java

e. Project Set Alarm = MainActivity.java (karena merupakan Implicit Intent, jadi code untuk set alarm langsung dibuat disini)

```
<?xml version="1.0" encoding="utf-8"?>
<manifest xmlns:android="http://schemas.android.com/apk/res/android"</pre>
  xmlns:tools="http://schemas.android.com/tools">
  <uses-permission
    android:name="com.android.alarm.permission.SET ALARM" />
  <application
    android:allowBackup="true"
    android:dataExtractionRules="@xml/data extraction rules"
    android:fullBackupContent="@xml/backup rules"
    android:icon="@mipmap/ic launcher"
    android:label="@string/app name"
    android:roundIcon="@mipmap/ic launcher round"
    android:supportsRtl="true"
    android:theme="@style/Theme.Design.Light"
    tools:targetApi="31">
    <activity
       android:name=".MainActivity"
       android:exported="true">
       <intent-filter>
         <action android:name="android.intent.action.SET_ALARM" />
         <category android:name="android.intent.category.DEFAULT" />
       </intent-filter>
    </activity>
```

```
<activity
  android:name=".HelloActivity"
  android:exported="true" />
<activity
  android:name=".TwoActivity"
  android:exported="true" />
<activity
  android:name=".Two2Activity"
  android:exported="true" />
<activity
  android:name=".CountActivity"
  android:exported="true" />
<activity
  android:name=".SianidaActivity"
  android:exported="true" />
<activity
  android:name=".SplashScreen"
  android:exported="true"
  android:theme="@style/SplashScreen">
  <intent-filter>
    <action android:name="android.intent.action.MAIN" />
    <category android:name="android.intent.category.LAUNCHER" />
```

```
</intent-filter>
    </activity>
  </application>
</manifest>
## 4. Code All Projects (Strings, Colors dan Dimens)
> `Strings.xml`

```

```
<string name="article_title"> Kasus Sianida</string>
<string name="article subtitle">ICE COLD!</string>
```

<string name="article\_text"> Film dokumenter Ice Cold: Murder, Coffee and Jessica Wongso memaparkan pertanyaan tak terjawab tentang persidangan yang dilalui Jessica Wongso. Dengan menyajikan perspektif baru, film ini hadir bertahun-tahun setelah kematian sahabat Jessica, Wayan Mirna Salihin.

Film ini menggambarkan bagaimana Jessica yang mengajak teman-temannya, termasuk Mirna, untuk bertemu setelah sekian lama tak berjumpa. Pertemuan di salah satu kafe di mal ibu kota tersebut pun berlangsung lancar, sebelum akhirnya Mirna pingsan sesaat setelah meminum kopi yang sebelumnya dipesan Jessica. Dokumenter ini turut menyajikan rekaman CCTV pada waktu kejadian, berbagai footage berita saat persidangan berlangsung, hingga wawancara eksklusif dengan beberapa sumber, termasuk Jessica Wongso.

Persidangan atas dugaan pembunuhan Mirna Salihin digelar lima bulan setelah kematiannya. Sidang tersebut melalui 32 kali persidangan dengan menghadirkan puluhan saksi di pengadilan. Hasilnya, Jessica Wongso divonis bersalah atas kematian Mirna dan dijatuhi hukuman 20 tahun penjara.

Kasus yang berjalan cukup lama tersebut menyita banyak perhatian dari masyarakat Indonesia. Musababnya, banyak misteri tak terjawab selama rangkaian persidangan yang panjang tersebut. Salah satunya adalah mengenai akses untuk mendapatkan bubuk sianida yang tidak bisa didapatkan oleh orang sembarangan. Selain itu, motif Jessica di balik pembunuhan tersebut pun belum menemukan jawabannya.

Film dokumenter buatan Netflix ini menyoroti rangkaian persidangan yang saat itu menjadi sidang pertama yang disiarkan secara langsung di berbagai stasiun televisi Indonesia. Selain itu, kasus ini juga diliput secara intens oleh media massa, baik nasional maupun internasional. Tak hanya itu, pihak rumah produksi Beach House Pictures juga berhasil mendapatkan akses untuk mewawancarai Jessica Wongso secara langsung dari balik tahanan. Dalam video trailer yang diluncurkannya, ditampilkan juga sejumlah wawancara eksklusif yang dilakukan dengan beberapa narasumber. Mulai dari ayah dan saudara kembar Mirna Salihin, pengacara Jessica

Wongso, jurnalis yang mendalami kasus tersebut, hingga bagaimana saat itu kasus ini begitu ramai diberitakan oleh media massa Indonesia dan internasional.</string>

import android.os.Bundle;
import android.util.Log;
import android.view.View;
import android.widget.EditText;
import android.widget.TextView;
public class TwoActivity extends AppCompatActivity {
  private static final String LOG TAG = TwoActivity.class.getSimpleName();
  public static final String EXTRA MESSAGE =
"com.example.android.Two2Activity.extra.MESSAGE";
  public static final int TEXT REQUEST = 1;
```

```
private EditText mMessageEditText;
private TextView mReplyHeadTextView;
private TextView mReplyTextView;
@Override
protected void onCreate(Bundle savedInstanceState) {
  super.onCreate(savedInstanceState);
  setContentView(R.layout.activity twoactivity);
  mMessageEditText = findViewById(R.id.editText main);
  mReplyHeadTextView = findViewById(R.id.text header reply);
  mReplyTextView = findViewById(R.id.text message reply);
}
public void LaunchSecondActivity(View view) {
  Log.d(LOG TAG, "Button clicked!");
  Intent intent = new Intent(this, Two2Activity.class);
  String message = mMessageEditText.getText().toString();
  intent.putExtra(EXTRA MESSAGE, message);
  startActivityForResult(intent, TEXT_REQUEST);
}
@Override
public void onActivityResult(int requestCode, int resultCode, Intent data) {
  super.onActivityResult(requestCode, resultCode, data);
```

```
if (requestCode == TEXT_REQUEST) {
       if (resultCode == RESULT OK) {
         String reply = data.getStringExtra(Two2Activity.EXTRA_REPLY);
         mReplyHeadTextView.setVisibility(View.VISIBLE);
         mReplyTextView.setText(reply);
         mReplyTextView.setVisibility(View.VISIBLE);
       }
> `Two2Activity.java`
package com.tgs9;
import android.content.Intent;
import android.os.Bundle;
import android.view.View;
import android.widget.EditText;
import android.widget.TextView;
import androidx.appcompat.app.AppCompatActivity;
public class Two2Activity extends AppCompatActivity {
  public static final String EXTRA_REPLY
="com.example.android.Two2Activity.extra.REPLY";
```

```
public static final String EXTRA MESSAGE
="com.example.android.Two2Activity.extra.MESSAGE";
  private EditText mReply;
  @Override
  protected void onCreate(Bundle savedInstanceState){
    super.onCreate(savedInstanceState);
    setContentView(R.layout.activity twoact2);
    mReply = findViewById(R.id.editText second);
    Intent intent = getIntent();
    String message = intent.getStringExtra(Two2Activity.EXTRA MESSAGE);
    TextView textView = findViewById(R.id.text message);
    textView.setText(message);
  public void returnReply(View view){
    String reply = mReply.getText().toString();
    Intent replyIntent = new Intent();
    setResult(RESULT_OK, replyIntent);
    finish();
}
## E. Code Project Set Alarm
> Pertama, buatlah button terlebih dahulu pada 'activity main.xml', bersama dengan button
```

aplikasi lainnya:

```
<Button
    android:id="@+id/btnSetAlarm"
    android:layout width="150dp"
    android:layout height="60dp"
    android:layout_below="@+id/btnTwoActivity"
    android:layout_alignParentStart="true"
    android:layout alignParentEnd="true"
    android:layout_marginStart="100dp"
    android:layout_marginTop="20dp"
    android:layout marginEnd="100dp"
    android:onClick="btnSetAlarm"
    android:background="@color/purple"
    android:text="Set Alarm"
    tools:ignore="UsingOnClickInXml"
    android:scaleType="centerCrop"/>
٠,,
> Lalu tambahkan code Implicit Intent pada 'MainActivity,java' :
findViewById(R.id.btnSetAlarm).setOnClickListener(new View.OnClickListener() {
       @Override
       public void onClick(View v) {
         // Panggil metode untuk mengatur alarm
         setAlarm();
       }
    });
```

٠,,

}

```
private void setAlarm() {
    Intent alarm = new Intent(android.provider.AlarmClock.ACTION SET ALARM);
    startActivity(alarm);
  }
> - Selanjutnya buka `AndroidManifest.xml` dan tambahkan code untuk izin membuka Alarm :
<uses-permission android:name="com.android.alarm.permission.SET_ALARM" />
٠,,
- Tambahkan code berikut pada bagian *application* agar set alarm dapat berjalan :
<activity
       android:name=".MainActivity"
       android:exported="true">
       <intent-filter>
         <action android:name="android.intent.action.SET_ALARM" />
         <category android:name="android.intent.category.DEFAULT" />
       </intent-filter>
</activity>
```

### Penjelasan & Hasil Program Tugas 2

#### 1. Menu Utama

Pertama yang harus kita lakukan adalah mengganti tampilan menu utamanya dengan code yang baru agar ikon tombol berubah menjadi gambar, caranya adalah :

Jika awal pembuatan project kita memilih template Empty Views Activity, maka pada layout otomatis terbuat file `activity\_main.xml` dan pada java akan ada `MainActivity.java`. Maka langsung saja kita buka `activity main.xml`, dan buat code seperti berikut ini:

```
<?xml version="1.0" encoding="utf-8"?>
<RelativeLayout xmlns:android="http://schemas.android.com/apk/res/android"</pre>
  xmlns:app="http://schemas.android.com/apk/res-auto"
  xmlns:tools="http://schemas.android.com/tools"
  android:layout width="match parent"
  android:layout height="match parent"
  tools:context=".MainActivity">
  <RelativeLayout
    android:layout width="500dp"
    android:layout height="match parent"
    android:background="@drawable/bg6">
  </RelativeLayout>
  <LinearLayout
    android:layout_width="match_parent"
```

```
android:layout_height="match_parent"
android:layout_marginLeft="16dp"
android:layout_marginTop="100dp"
android:layout_marginRight="16dp"
android:orientation="vertical">
```

## <TextView

android:id="@+id/textView"

android:layout\_width="match\_parent"

android:layout\_height="wrap\_content"

android:fontFamily="serif"

android:text="Menu Program"

android:textAlignment="center"

android:textColor="@color/black"

android:textSize="34sp"

android:textStyle="bold"/>

# <LinearLayout

android:layout\_width="match\_parent"
android:layout\_height="150dp"
android:layout\_margin="5dp"
android:orientation="horizontal">

<androidx.cardview.widget.CardView
android:id="@+id/cdMenu1"
android:layout\_width="match\_parent"
android:layout\_height="match\_parent"
android:layout\_margin="10dp"</pre>

```
android:layout_weight="1"
  app:cardCornerRadius="20dp"
  app:cardElevation="7dp">
  <LinearLayout
    android:layout width="match parent"
    android:layout_height="match_parent"
    android:orientation="vertical">
    <ImageView
      android:id="@+id/imageView0"
      android:layout width="match parent"
      android:layout_height="wrap_content"
      android:layout margin="16dp"
      android:layout weight="1"
      app:srcCompat="@drawable/worldwide" />
    <TextView
      android:id="@+id/textView0"
      android:layout_width="match_parent"
      android:layout height="wrap content"
      android:fontFamily="serif"
      android:text="Hello World"
      android:textAlignment="center"
      android:textSize="18dp"
      android:textStyle="bold" />
  </LinearLayout>
</androidx.cardview.widget.CardView>
```

```
<androidx.cardview.widget.CardView
  android:id="@+id/cdMenu2"
  android:layout width="match parent"
  android:layout height="match parent"
  android:layout_margin="10dp"
  android:layout_weight="1"
  app:cardCornerRadius="20dp"
  app:cardElevation="7dp">

         </LinearLayout>
       </androidx.cardview.widget.CardView>
    </LinearLayout>
  </LinearLayout>
</RelativeLayout>
> - Setelah itu kita buka 'MainActivity.java' untuk menambahkan code intent untuk masing-
masing tombol:
package com.cipaapps;
import android.content.Intent;
```

android:layout\_height="wrap\_content"

```
import android.net.Uri;
import android.os.Bundle;
import android.view.View;
import androidx.appcompat.app.AppCompatActivity;
public class MainActivity extends AppCompatActivity {
  @Override
  protected void onCreate(Bundle savedInstanceState) {
    super.onCreate(savedInstanceState);
    setContentView(R.layout.activity main);
    findViewById(R.id.cdMenu4).setOnClickListener(new View.OnClickListener() {
       @Override
       public void onClick(View v) {
         setAlarm();
    });
    findViewById(R.id.cdMenu1).setOnClickListener(new View.OnClickListener() {
       @Override
       public void onClick(View v) {
         // Ketika tombolSatu ditekan, pindah ke HelloActivity
         Intent helloworld = new Intent(MainActivity.this, HelloActivity.class);
         startActivity(helloworld);
    });
```

```
findViewById(R.id.cdMenu2).setOnClickListener(new View.OnClickListener() {
  @Override
  public void onClick(View v) {
    // Ketika tombolDua ditekan, lakukan aksi yang diinginkan
    // Misalnya, pindah ke aktivitas lain atau jalankan fungsi khusus
    Intent toast = new Intent(MainActivity.this, CountActivity.class);
    startActivity(toast);
  }
});
findViewById(R.id.cdMenu3).setOnClickListener(new View.OnClickListener() {
  @Override
  public void onClick(View v) {
    // Ketika tombolDua ditekan, lakukan aksi yang diinginkan
    // Misalnya, pindah ke aktivitas lain atau jalankan fungsi khusus
    Intent sianida = new Intent(MainActivity.this, SianidaActivity.class);
    startActivity(sianida);
  }
});
findViewById(R.id.cdMenu5).setOnClickListener(new View.OnClickListener() {
  @Override
  public void onClick(View v) {
    // Ketika tombolDua ditekan, lakukan aksi yang diinginkan
    // Misalnya, pindah ke aktivitas lain atau jalankan fungsi khusus
    Intent twoactivity = new Intent(MainActivity.this, TwoActivity.class);
    startActivity(twoactivity);
```

```
}
  });
  findViewById(R.id.cdMenu6).setOnClickListener(new View.OnClickListener() {
    @Override
    public void onClick(View v) {
       // Example location: Jakarta, Indonesia
       Uri geoLocation = Uri.parse("geo:-6.2088,106.8456");
       openMaps(geoLocation);
    }
  });
private void setAlarm() {
  Intent alarmIntent = new Intent(android.provider.AlarmClock.ACTION SET ALARM);
  // Add extra details for the alarm, e.g., alarm time, label, etc.
  // alarmIntent.putExtra(...
  startActivity(alarmIntent);
}
private void openMaps(Uri geoLocation) {
  Intent maps = new Intent(Intent.ACTION VIEW);
  maps.setData(geoLocation);
  if (maps.resolveActivity(getPackageManager()) != null) {
    startActivity(maps);
```

```
}
...
> Button *HelloWorld, Count, Sianida dan TwoActivity* menggunakan Explicit Intent, dan
untuk project *SetAlarm* beserta *Maps* menggunakan Implicit Intent.
> Menu halaman utama dan tombol-tombol aplikasi sudah berhasil dibuat. Maka selanjutnya
yang kita lakukan adalah menambahkan coding pada 'AndroidManifest.xml' agar aplikasi dapat
berjalan.
**2. AndroidManifest.xml**
Didalam 'AndroidManifest.xml' kita tambahkan semua java class dari semua project kita
sebelumnya. Berikut nama java class dari berbagai project yang telah saya buat:
a. Project Hello World = HelloActivity.java
b. Project Count = CountActivity.java
c. Project Scroll Movie = SianidaActivity.java
d. Project TwoActivity = TwoActivity.java dan Two2Activity.java
e. Project Set Alarm = MainActivity.java
f. Project Maps = MainActivity.java (karena merupakan Implicit Intent, jadi code untuk
SetAlarm dan Maps langsung dibuat disini)
٠.,
<?xml version="1.0" encoding="utf-8"?>
<manifest xmlns:android="http://schemas.android.com/apk/res/android"</pre>
```

```
xmlns:tools="http://schemas.android.com/tools">
<uses-permission
  android:name="com.android.alarm.permission.SET ALARM" />
<application
  android:allowBackup="true"
  android:dataExtractionRules="@xml/data extraction rules"
  android:fullBackupContent="@xml/backup rules"
  android:icon="@mipmap/ic_launcher"
  android:label="@string/app name"
  android:roundIcon="@mipmap/ic launcher round"
  android:supportsRtl="true"
  android:theme="@style/Theme.Design.Light"
  tools:targetApi="31">
  <activity
    android:name=".MainActivity"
    android:exported="true">
    <intent-filter>
       <action android:name="android.intent.action.SET ALARM" />
       <category android:name="android.intent.category.DEFAULT" />
       <action android:name="android.intent.action.VIEW" />

<string name="article_title"> Kasus Sianida</string>
<string name="article_subtitle">ICE COLD!</string>
```

<string name="article\_text"> Film dokumenter Ice Cold: Murder, Coffee and Jessica Wongso memaparkan pertanyaan tak terjawab tentang persidangan yang dilalui Jessica Wongso. Dengan menyajikan perspektif baru, film ini hadir bertahun-tahun setelah kematian sahabat Jessica, Wayan Mirna Salihin.

Film ini menggambarkan bagaimana Jessica yang mengajak teman-temannya, termasuk Mirna, untuk bertemu setelah sekian lama tak berjumpa. Pertemuan di salah satu kafe di mal ibu kota tersebut pun berlangsung lancar, sebelum akhirnya Mirna pingsan sesaat setelah meminum kopi yang sebelumnya dipesan Jessica. Dokumenter ini turut menyajikan rekaman CCTV pada waktu kejadian, berbagai footage berita saat persidangan berlangsung, hingga wawancara eksklusif dengan beberapa sumber, termasuk Jessica Wongso.

Persidangan atas dugaan pembunuhan Mirna Salihin digelar lima bulan setelah kematiannya. Sidang tersebut melalui 32 kali persidangan dengan menghadirkan puluhan saksi di pengadilan. Hasilnya, Jessica Wongso divonis bersalah atas kematian Mirna dan dijatuhi hukuman 20 tahun penjara.

Kasus yang berjalan cukup lama tersebut menyita banyak perhatian dari masyarakat Indonesia. Musababnya, banyak misteri tak terjawab selama rangkaian persidangan yang panjang tersebut. Salah satunya adalah mengenai akses untuk mendapatkan bubuk sianida yang tidak bisa didapatkan oleh orang sembarangan. Selain itu, motif Jessica di balik pembunuhan tersebut pun belum menemukan jawabannya.

Film dokumenter buatan Netflix ini menyoroti rangkaian persidangan yang saat itu menjadi sidang pertama yang disiarkan secara langsung di berbagai stasiun televisi Indonesia. Selain itu, kasus ini juga diliput secara intens oleh media massa, baik nasional maupun internasional. Tak hanya itu, pihak rumah produksi Beach House Pictures juga berhasil mendapatkan akses untuk mewawancarai Jessica Wongso secara langsung dari balik tahanan. Dalam video trailer yang diluncurkannya, ditampilkan juga sejumlah wawancara eksklusif yang dilakukan dengan beberapa narasumber. Mulai dari ayah dan saudara kembar Mirna Salihin, pengacara Jessica

Wongso, jurnalis yang mendalami kasus tersebut, hingga bagaimana saat itu kasus ini begitu ramai diberitakan oleh media massa Indonesia dan internasional.</string>

    finish();
  }
```

```
**Code Project SetAlarm dan Maps**
> Pertama, buatlah ikon tombol terlebih dahulu pada 'activity main.xml', bersama dengan ikon
tombol aplikasi lainnya:
- 'Set Alarm'
<androidx.cardview.widget.CardView
         android:id="@+id/cdMenu4"
         android:layout width="match parent"
         android:layout height="match parent"
         android:layout margin="10dp"
         android:layout weight="1"
         app:cardCornerRadius="20dp"
         app:cardElevation="7dp">
         <LinearLayout
           android:layout width="match parent"
           android:layout height="match parent"
           android:orientation="vertical">
           <ImageView
             android:id="@+id/imageView3"
             android:layout_width="match_parent"
             android:layout height="wrap content"
             android:layout_margin="16dp"
             android:layout_weight="1"
             app:srcCompat="@drawable/alarm 1 "/>
           <TextView
```

```
android:id="@+id/textView3"
             android:layout width="match parent"
             android:layout_height="wrap_content"
             android:fontFamily="serif"
             android:text="Alarm"
             android:textAlignment="center"
             android:textSize="18dp"
             android:textStyle="bold" />
         </LinearLayout>
      </androidx.cardview.widget.CardView>
    </LinearLayout>
- 'Maps'
<androidx.cardview.widget.CardView
         android:id="@+id/cdMenu6"
         android:layout_width="match_parent"
         android:layout height="match parent"
         android:layout_margin="10dp"
         android:layout_weight="1"
         app:cardCornerRadius="20dp"
         app:cardElevation="7dp">
         <LinearLayout
           android:layout_width="match_parent"
           android:layout height="match parent"
           android:orientation="vertical">
```

```
android:id="@+id/imageView5"
             android:layout width="match parent"
             android:layout height="wrap content"
             android:layout margin="16dp"
             android:layout_weight="1"
             app:srcCompat="@drawable/gps" />
           <TextView
             android:id="@+id/textView5"
             android:layout width="match parent"
             android:layout_height="wrap_content"
             android:fontFamily="serif"
             android:text="Maps"
             android:textAlignment="center"
             android:textSize="18dp"
             android:textStyle="bold" />
         </LinearLayout>
٠,,
> Lalu tambahkan code Implicit Intent pada 'MainActivity.java' :
- 'SetAlarm'
findViewById(R.id.cdMenu4).setOnClickListener(new View.OnClickListener() {
       @Override
       public void onClick(View v) {
```

<ImageView

```
setAlarm();
       }
     });
private void setAlarm() {
    Intent alarmIntent = new Intent(android.provider.AlarmClock.ACTION SET ALARM);
    // Add extra details for the alarm, e.g., alarm time, label, etc.
    // alarmIntent.putExtra(...
    startActivity(alarmIntent);
- 'Maps'
findViewById(R.id.cdMenu6).setOnClickListener(new View.OnClickListener() {
       @Override
       public void onClick(View v) {
         // Example location: Jakarta, Indonesia
         Uri geoLocation = Uri.parse("geo:-6.2088,106.8456");
         openMaps(geoLocation);
       }
     });
private void openMaps(Uri geoLocation) {
    Intent maps = new Intent(Intent.ACTION VIEW);
    maps.setData(geoLocation);
    if (maps.resolveActivity(getPackageManager()) != null) {
       startActivity(maps);
  }
```

٠,,

</intent-filter>

</activity>

## Penjelasan & Hasil Program Tugas 3

> Pada tugas 3 saya melakukan perubahan pada nama aplikasi, lalu gambar icon aplikasi dan juga pada splashscreen, untuk cara dan isi code nya sama seperti pada tugas 2 hanya menyesuaikan saja dengan yang baru.

```
**Fill in All The Code in This Project :**
> 1. ***Gradle Script*** => 'build.gradle.kts (Module :app)'
plugins {
  id("com.android.application")
}
android {
  namespace = "com.cipaapps"
  compileSdk = 34
  defaultConfig {
    applicationId = "com.cipaapps"
     minSdk = 21
     targetSdk = 33
     versionCode = 1
     versionName = "1.0"
    testInstrumentationRunner = "androidx.test.runner.AndroidJUnitRunner" \\
  }
  buildTypes {
    release {
```

```
isMinifyEnabled = false
       proguardFiles(getDefaultProguardFile("proguard-android-optimize.txt"), "proguard-
rules.pro")
     }
  compileOptions {
    sourceCompatibility = JavaVersion.VERSION 1 8
    targetCompatibility = JavaVersion.VERSION 1 8
  }
  buildToolsVersion = "34.0.0"
dependencies {
  val fragment version = "1.6.1"
  implementation("androidx.appcompat:1.6.1")
  implementation("com.google.android.material:material:1.10.0")
  implementation("androidx.constraintlayout:constraintlayout:2.1.4")
  testImplementation("junit:junit:4.13.2")
  androidTestImplementation("androidx.test.ext:junit:1.1.5")
  androidTestImplementation("androidx.test.espresso:espresso-core:3.5.1")
  implementation("androidx.fragment:fragment:$fragment version")
}
- Setelah itu klik 'Sync now'
> 2. ***AndroidManifest.xml***
- Lengkapi code ini pada `AndroidManifest.xml` yang sudah berisikan dengan code-code di
project sebelumnya.
```

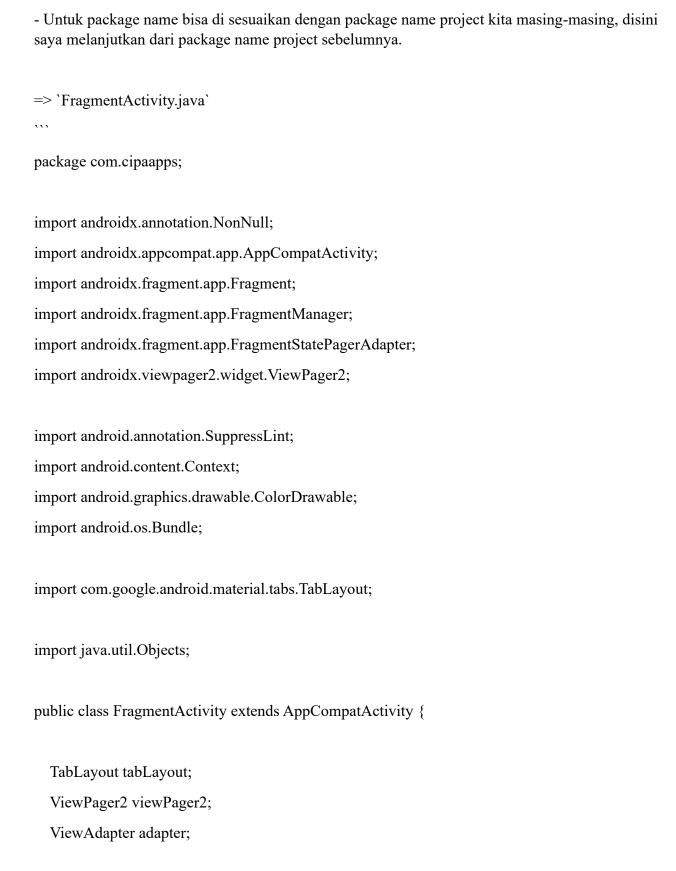

```
<activity android:name=".VideoPlayerActivity" />
> 3. ***Java***
=> Pada 'MainActivity.java' saya melakukan penambahan code, yaitu isi code keseluruhannya
adalah:
- 'MainAcitivity.java'
package com.cipaapps;
import android.annotation.SuppressLint;
import android.content.Intent;
import android.net.Uri;
import android.os.Bundle;
import android.view.View;
import androidx.appcompat.app.AppCompatActivity;
public class MainActivity extends AppCompatActivity {
  @SuppressLint("MissingInflatedId")
  @Override
  protected void onCreate(Bundle savedInstanceState) {
    super.onCreate(savedInstanceState);
    setContentView(R.layout.activity main);
     findViewById(R.id.cdMenu5).setOnClickListener(new View.OnClickListener() {
       @Override
```

```
public void onClick(View v) {
    setAlarm();
  }
});
findViewById(R.id.cdMenu1).setOnClickListener(new View.OnClickListener() {
  @Override
  public void onClick(View v) {
    // Ketika tombolSatu ditekan, pindah ke HelloActivity
    Intent helloworld = new Intent(MainActivity.this, HelloActivity.class);
    startActivity(helloworld);
  }
});
findViewById(R.id.cdMenu2).setOnClickListener(new View.OnClickListener() {
  @Override
  public void onClick(View v) {
    // Ketika tombolDua ditekan, lakukan aksi yang diinginkan
    // Misalnya, pindah ke aktivitas lain atau jalankan fungsi khusus
    Intent toast = new Intent(MainActivity.this, CountActivity.class);
    startActivity(toast);
  }
});
findViewById(R.id.cdMenu3).setOnClickListener(new View.OnClickListener() {
  @Override
  public void onClick(View v) {
```

```
// Ketika tombolDua ditekan, lakukan aksi yang diinginkan
    // Misalnya, pindah ke aktivitas lain atau jalankan fungsi khusus
    Intent sianida = new Intent(MainActivity.this, SianidaActivity.class);
    startActivity(sianida);
  }
});
findViewById(R.id.cdMenu4).setOnClickListener(new View.OnClickListener() {
  @Override

    // Ketika tombolDua ditekan, lakukan aksi yang diinginkan
    // Misalnya, pindah ke aktivitas lain atau jalankan fungsi khusus
    Intent twoactivity = new Intent(MainActivity.this, TwoActivity.class);
    startActivity(twoactivity);
  }
});
findViewById(R.id.cdMenu7).setOnClickListener(new View.OnClickListener() {
  @Override
  public void onClick(View v) {
    // Ketika tombolDua ditekan, lakukan aksi yang diinginkan
    // Misalnya, pindah ke aktivitas lain atau jalankan fungsi khusus
    Intent fragmentactivity = new Intent(MainActivity.this, FragmentActivity.class);
    startActivity(fragmentactivity);
  }
});
findViewById(R.id.cdMenu6).setOnClickListener(new View.OnClickListener() {
```

```
@Override
       public void onClick(View v) {
         // Example location: Jakarta, Indonesia
         Uri geoLocation = Uri.parse("geo:-6.2088,106.8456");
         openMaps(geoLocation);
    });
  }
  private void setAlarm() {
    Intent alarmIntent = new Intent(android.provider.AlarmClock.ACTION SET ALARM);
    // Add extra details for the alarm, e.g., alarm time, label, etc.
    // alarmIntent.putExtra(...
    startActivity(alarmIntent);
  }
  private void openMaps(Uri geoLocation) {
    Intent maps = new Intent(Intent.ACTION VIEW);
    maps.setData(geoLocation);
    if (maps.resolveActivity(getPackageManager()) != null) {
       startActivity(maps);
  }
}
```

> Note : Isi code pada keseluruhan tugas 3 ini tetap sama seperti pada isi code tugas 2 yaitu seperti \*Java class\* dan untuk \*res/layout\* hanya sedikit merubah design, pada tugas 3 ini saya hanya mencantumkan dan menjelaskan code-code yang ditambahkan untuk `Fragment` saja.

```
@SuppressLint({"NewApi", "MissingInflatedId"})
  @Override
  protected void onCreate(Bundle savedInstanceState) {
    super.onCreate(savedInstanceState);
    setContentView(R.layout.activity movie);
    Objects.requireNonNull(getSupportActionBar()).setBackgroundDrawable(new
ColorDrawable(getColor(R.color.cream)));
    tabLayout = findViewById(R.id.tab);
    viewPager2 = findViewById(R.id.view);
    adapter = new ViewAdapter(this);
    viewPager2.setAdapter(adapter);
    tabLayout.addOnTabSelectedListener(new TabLayout.OnTabSelectedListener() {
       @Override
       public void onTabSelected(TabLayout.Tab tab) {
         viewPager2.setCurrentItem(tab.getPosition());
       }
       @Override
       public void onTabUnselected(TabLayout.Tab tab) {
       }
       @Override
       public void onTabReselected(TabLayout.Tab tab) {
```

```
}
});
class Halaman extends FragmentStatePagerAdapter {
  Context context;
  int jumlah tab;
  Halaman(Context context, FragmentManager fm, int jml_tab)
  {
    super(fm);
    this.context=context;
    this.jumlah tab=jml tab;
  }
  @NonNull
  @Override
  public Fragment getItem(int posisition){
    switch (posisition){
       case 0:return new ActionFragment();
       case 1:return new ComedyFragment();
       case 2:return new RomanceFragment();
     }
    return null;
  @Override
  public int getCount(){
    return jumlah_tab;
```

```
}
     viewPager2.registerOnPageChangeCallback(new ViewPager2.OnPageChangeCallback() {
       @Override
       public void onPageSelected(int position) {
         super.onPageSelected(position);
         tabLayout.getTabAt(position).select();
       }
     });
=> Membuat file fragment dengan cara klik kanan pada 'MainActivity.java' lalu pilih dan klik
fragment, setelah itu kita pilih dan klik fragment (Blank), setelah itu kita beri nama
'ActionFragment', 'ComedyFragment', 'RomanceFragment'. Untuk file fragment sudah
sekaligus dengan file layout xml nya (code berada pada bagian res 'layout')
- `ActionFragment.java` :
٠,,
package com.cipaapps;

    String videoPath = "android.resource://" + getActivity().getPackageName() + "/" +
videoResource;
    Intent intent = new Intent(getActivity(), VideoPlayerActivity.class);
    intent.putExtra("VIDEO PATH", videoPath);
    startActivity(intent);
  }
=> Lalu buat java class dengan nama 'ViewAdapter.java', yang berisi code :
package com.cipaapps;
```

}

```
import androidx.annotation.NonNull;
import androidx.fragment.app.Fragment;
import androidx.fragment.app.FragmentActivity;
import androidx.viewpager2.adapter.FragmentStateAdapter;
public class ViewAdapter extends FragmentStateAdapter {
  public ViewAdapter(@NonNull FragmentActivity fragmentActivity) {
    super(fragmentActivity);
  }
  @NonNull
  @Override
  public Fragment createFragment(int position) {
    switch (position){
       case 0:
         return new ActionFragment();
       case 1:
         return new ComedyFragment();
       case 2:
         return new RomanceFragment();
       default:
         return new ActionFragment();
  }
  @Override
  public int getItemCount() {
```

```
return 3;
=> Setelah itu membuat java class untuk memutar video dengan nama
'VideoPlayerActivity.java', yang berisi code:
package com.cipaapps;
import android.content.pm.ActivityInfo;
import android.net.Uri;
import android.os.Bundle;
import android.view.Menu;
import android.view.MenuItem;
import android.view.View;
import android.view.ViewGroup;
import android.widget.MediaController;
import android.widget.RelativeLayout;
import android.widget.VideoView;
import androidx.annotation.NonNull;
import androidx.annotation.Nullable;
import androidx.appcompat.app.AppCompatActivity;
public class VideoPlayerActivity extends AppCompatActivity {
  private VideoView videoView; // Deklarasi VideoView sebagai variabel global
```

```
private int originalOrientation;
@Override
protected void onCreate(@Nullable Bundle savedInstanceState) {
  super.onCreate(savedInstanceState);
  setContentView(R.layout.activity video player);
  // Get the video URI from the intent
  String videoPath = getIntent().getStringExtra("VIDEO_PATH");
  Uri uri = Uri.parse(videoPath);
  // Set up VideoView
  videoView = findViewById(R.id.videoView); // Inisialisasi variabel videoView
  videoView.setVideoURI(uri);
  // Set up MediaController
  MediaController mediaController = new MediaController(this);
  mediaController.setAnchorView(videoView);
  videoView.setMediaController(mediaController);
  // Start playing the video
  videoView.start();
  // Get the original orientation
  originalOrientation = getResources().getConfiguration().orientation;
  // Adjust video layout based on the original orientation
  adjustVideoLayout(originalOrientation);
```

```
}
@Override
protected void onResume() {
        super.onResume();
        // Detect orientation changes and adjust VideoView layout
        int currentOrientation = getResources().getConfiguration().orientation;
        if (currentOrientation != originalOrientation) {
                 adjustVideoLayout(currentOrientation);
                 originalOrientation = currentOrientation;
private void adjustVideoLayout(int orientation) {
        if (orientation == ActivityInfo.SCREEN_ORIENTATION_LANDSCAPE ||
                          orientation == ActivityInfo.SCREEN\_ORIENTATION\_REVERSE\_LANDSCAPE) \ \{ boundaries of the content of the conten
                // Landscape mode
                 setFullscreen(true);
         } else {
                 // Portrait or other orientations
                 setFullscreen(false);
}
private void setFullscreen(boolean fullscreen) {
        if (fullscreen) {
                 // Hide action bar
                 if (getSupportActionBar() != null) {
```

```
getSupportActionBar().hide();
  }
 // Set VideoView layout parameters for fullscreen
  RelativeLayout.LayoutParams params = new RelativeLayout.LayoutParams(
      ViewGroup.LayoutParams.MATCH PARENT,
      ViewGroup.LayoutParams.MATCH PARENT
  );
  params.addRule(RelativeLayout.CENTER IN PARENT);
  videoView.setLayoutParams(params);
 // Hide navigation bar and status bar
  getWindow().getDecorView().setSystemUiVisibility(
      View.SYSTEM UI FLAG FULLSCREEN |
          View.SYSTEM UI FLAG HIDE NAVIGATION
          View.SYSTEM UI FLAG IMMERSIVE STICKY);
} else {
 // Show action bar
  if (getSupportActionBar() != null) {
    getSupportActionBar().show();
  }
 // Set VideoView layout parameters for normal mode
  RelativeLayout.LayoutParams params = new RelativeLayout.LayoutParams(
      ViewGroup.LayoutParams.MATCH PARENT,
      ViewGroup.LayoutParams.WRAP CONTENT
  );
  params.addRule(RelativeLayout.CENTER IN PARENT);
```

```
videoView.setLayoutParams(params);
      // Show navigation bar and status bar
       getWindow().getDecorView().setSystemUiVisibility(
           View.SYSTEM UI FLAG VISIBLE);
  }
  @Override
  public boolean onCreateOptionsMenu(Menu menu) {
    getMenuInflater().inflate(R.menu.menu video player, menu);
    return true;
  }
  @Override
  public boolean onOptionsItemSelected(@NonNull MenuItem item) {
    if (item.getItemId() == R.id.action back) {
      // Tambahkan logika untuk kembali ke halaman sebelumnya atau finish activity
       finish();
       return true;
    return super.onOptionsItemSelected(item);
  }
> 4. ***res***
```

```
=> Pada bagian 'Drawable' saya menambahkan *Drawable Resource File* dengan nama
'bg cardview.xml', yang berisikan code:
<!-- cardview_pressed_effect.xml -->

    <item name="colorOnPrimary">@color/white</item>
    <!-- Secondary brand color. -->
    <item name="colorSecondary">@color/hijau</item>
    <item name="colorSecondaryVariant">@color/hijaumuda</item>
    <item name="colorOnSecondary">@color/black</item>
    <!-- Status bar color. -->
    <item name="android:statusBarColor">@color/choco</item>
    <item name="android:navigationBarColor">@color/choco</item>
    <!-- Customize your light theme here. -->
```

```
</style>
  <style name="Theme.TabExperiment" parent="Base.Theme.TabExperiment" />
</resources>
=> Untuk menambahkan video pada Android Studio disini saya memakai
'res/raw/video kita.mp4', yaitu caranya yang pertama kita klik kanan terlebih dahulu di bagian
'res' lalu kita pilih dan klik 'new' lalu pilih dan klik bagian 'Android Resource Directory',
setelah itu ada bagian 'Resource type' kita pilih 'raw' lalu kita klik OK. Lalu setelah itu
langsung saja kita copy paste video yang kita ingin masukkan ke dalam project kita ke dalam
'raw'.
=> 'layout'
=> Pada 'activity main.xml' saya melakukan penambahan dan perubahan code untuk design
nya, yaitu isi code keseluruhannya adalah:
- 'activity main.xml':
٠,,

android:text="Tells the story of Na Bo-ra, a student who vows to follow Baek Hyun-jin for the sake of her sick friend. However, Bo-ra falls in love with Poong Woon-ho, Hyun-jin's best friend. In the confusion of the love triangle, Bo-ra hides her feelings so as not to hurt her best friend who turns out to love Woon-ho. When Woon-ho returns to New Zealand, Bo-ra and Yeon-du arrive at the train station at the right time, allowing them to confess their feelings before going their separate ways. However, Woon-ho suddenly disappears from Bo-ra's life, leaving her heart broken.

Over time, Bo-ra enters university and lives an adult life. In 2019, he received an art exhibition invitation from Joseph, Woon-ho's younger brother. Here, Bo-ra learns that Woon-ho died in an accident years ago. Joseph thanks Bo-ra for remembering his brother and reveals that Woon-ho's happiest moments were with Bo-ra. While watching the video Woon-ho made, Bo-ra reflects on the happy memories they shared.

Set in 1999 and 2019, it takes the audience on Bo-ra's emotional journey full of confusion, love, friendship and loss. This film depicts the complexity of human relationships over time, with a story that touches the heart and leaves a deep impression." />

android:text="The storyline is about the complicated relationships among a group of close friends who grow up together and face various life trials. With secrets and conflicts emerging, they must struggle to understand and accept each other, while going on a journey to find love and identity. Through a story full of intrigue and emotion, Hidden Love reveals hidden layers of relationships and shows the journey towards maturity and understanding." />

=> Pada directory `drawable` kita bisa tambahkan gambar seperti poster film yang ingin kita tampilkan, dan jangan lupa untuk menambahkan icon `baseline\_more\_vert\_24.xml` dengan cara klik kanan pada `drawable` lalu klik New, setelah itu kita pilih dan klik Vector Asset. Setelah itu kita klik clip art lalu kita pilih icon nya, jika sudah ketemu kita klik OK lalu kita klik next. Sama halnya ketika kita ingin menambahkan menu kembali pada halaman `VideoPlayerActivity` yaitu dengan langkah-langkah yang sama seperti sebelumnya dan jangan lupa untuk menambahkan icon `baseline\_arrorw\_circle\_left\_24.xml` lalu klik OK dan kita klik next.

```
=> Selanjutnya kita klik kanan pada 'res' lalu pilih dan klik 'Android Resource Directory'
setelah itu kita beri nama "menu" lalu klik OK. Setelah itu kita buat Menu Resource File dengan
nama 'menu tab.xml' lalu isi dengan code:
<?xml version="1.0" encoding="utf-8"?>
<menu xmlns:tools="http://schemas.android.com/tools"</pre>
  xmlns:android="http://schemas.android.com/apk/res/android"
  xmlns:app="http://schemas.android.com/apk/res-auto">
  <item
    android:id="@+id/tab action"
    android:icon="@drawable/baseline more vert 24"
    android:title="Action"/>
  <item
    android:id="@+id/tab comedy"
    android:icon="@drawable/baseline more vert 24"
    android:title="Comedy"/>
  <item
    android:id="@+id/tab romance"
    android:icon="@drawable/baseline more vert 24"
    android:title="Romance"/>
</menu>
٠,,
=> Sama halnya ketika ingin menambahkan code menu untuk kembali, dengan cara kita klik
kanan pada directory 'menu' dan buat Menu Resource File dengan nama
'menu video player.xml' lalu isi dengan code:
<?xml version="1.0" encoding="utf-8"?>
```

```
<menu xmlns:app="http://schemas.android.com/apk/res-auto"
    xmlns:android="http://schemas.android.com/apk/res/android">
    <item
        android:id="@+id/action_back"
        android:icon="@drawable/baseline_arrow_circle_left_24"
        android:title="Back"
        app:showAsAction="always" />
        </menu>
```
